GOODS DELIVERY REPORT

GENERAL INFORMATION

Vessel: Petrobras
Delivery Date: March 26, 2026
Company Responsible for Delivery: Nitshore
Operation Location: Port / Barge

Operation Schedule

- Arrival at the port: 13:00
- Scheduled start time: 14:00
- Start of barge loading: 15:50
- Departure from the port: 16:48
- Arrival at the vessel: 17:16
- Start of onboard operations: 18:25
- Completion of the operation: 20:24

Photographic Record

Transport Conditions

The goods were transferred to the barge, with refrigerated and frozen containers remaining powered throughout the entire transport using generators, ensuring the maintenance of the cold chain until delivery.

The transport was carried out in accordance with good practices for food handling and transportation, ensuring product integrity and safety.

Photographic Record – Transport

Temperature Control – During Transport

During transport, the following temperatures were recorded:

- Refrigerated container: 7.9°C
- Frozen container: -23.8°C

These values are within the recommended parameters for the preservation of perishable foods, in accordance with current sanitary regulations.

Photographic Record – Transport Temperatures

Temperature Control – At the Time of Delivery

At the time of opening and inspection onboard, the recorded temperatures were:

- Refrigerated container: 6.8°C
- Thermal box (refrigerated products): 5.8°C
- Frozen container: -18°C
- Thermal box (frozen products): -43°C

These records demonstrate that the cold chain was maintained throughout all stages of the operation, meeting food safety requirements.

Final Remarks

The delivery operation was carried out satisfactorily, in compliance with standard operating procedures and good food handling practices, in accordance with applicable sanitary guidelines.

Throughout the entire process, the containers remained powered by generators, ensuring continuous temperature control and preservation of the cold chain.

The delivery was completed without any incidents, ensuring the safety, quality, and compliance of the products supplied to the vessel.
